## *Traffic Light Installation – Graves Street and Newton Road*

**To the Honourable Speaker and Members of the House of Representatives assembled in Parliament.**

The following citizens of Australia draws to the attention of the House that there is a vital need for traffic lights on the corner of Graves Street and Newton Road, Campbelltown, South Australia to enable both vehicle and pedestrian traffic to use this intersection safely.

We the undersigned are aware that the increased traffic and congestion at the intersection of Graves Street and Newton Road has created a hazardous situation for pedestrians and vehicles. Vehicles, especially large public transport buses and commercial vehicles, have difficulty turning right from Graves Street on to Newton Road. This causes traffic to bank up and impatient road users to take unnecessary risks and endanger lives. The community has several elderly pedestrian and motorists who find it increasingly more difficult to safely negotiate the vehicular movement.

Your petitioners therefore request the House to support this important community issue and encourage the State Government of South Australia to ensure that traffic lights are installed on the corner of Graves Street and Newton Road as soon as possible.
